Zope power!

- ... eta Zope deskubritu genuen
- Web bidez webguneak erraz-erraz egiteko tresna
- DTML izeneko PHPren antzeko zerbait zuen barruan
- Eta python scriptak, eta MySQL konexioak, eta beste mila gauza

Solasaldi Literarioak

Plazara Goaz eta Donostia Kultura 2012-10-16 / 08:51

Xabier Amurizak liburu berria du honezkero, Zazpi ebidentzia birjalotzarako.

Arazo nagusiok "ebidentzia" moduan aurkezten ditut, halakoxeak direla uste dudalako; ebidentziak. Ebidentzien aurrean, jarrera bakarra dago: onarpena ala ezezpena. Har ala utz. Bitarteko eztabaidak ez du onura handirik."

18an, 19:30ean, Larrotxene Kultur Etxean Xabier ...

Localizer

Localizer is the standard Zope product to develop and build multilingual web applications. Provides solutions to internationalize and localize both the software and the content.

The Message Catalog

Message catalogs store messages and their translations in the ZODB, and provide a web interface to manage them. They're useful to translate the application interface: labels, buttons, etc..

The Localizer object

The Localizer objects allows to customize the language negotiation policy of your web site.

Local Content objects

The LocalContent object is used to store and manage multilingual data. A single object has different properties, multilingual and monolingual, for the multilingual ones it's possible to have different language versions.

Local Folders

The LocalFolder object provides a generic solution to internationalize any Zope object. Use it to provide images in multiple languages, output dates in locale formats, etc..

Download **Localizer 1.2.3**, for Zope 2.9 to 2.11, needs **itools**

EuroZope 2001 - Amsterdam

EuroZopeCon Amsterdam: January 23-24, 2001

[EuroZopeCon Amsterdam](#), a free conference about the Open Source Web content management system "Zope", will take place on the 23th and 24th of January, 2001, during Linux Expo Amsterdam.

The Open Source software Zope is a Web application server and content management system developed by Digital Creations and by a worldwide community of developers.

The EuroZopeCon Amsterdam conference program will include talks for beginners as well as technical discussions for advanced developers. Among the currently scheduled talks: "Diving into Zope for the first time", "Zope and XML", "A ZPatterns tutorial", "Project management with Zope", "A groupware solution with Zope", "WebDAV", "Zope Enterprise Integration Portal Toolkit"...

"EuroZopeCon Amsterdam, like previous EuroZope meetings, is the answer to the growing interest for Open Source content management platforms in the Internet and Intranet business world. The Zope users community has shown its dynamism and maturity by self-organizing a conference for beginners as well as expert Web developers" says Stéphane Fermigier, CEO of Nuxeo, a French Internet development company, as well as an active member of EuroZope.

EuroZopeCon Amsterdam will be made possible by the support of the following companies and organizations:

- Beehive Elektronische Medien GmbH (Germany) - <http://www.beehive.de/>
- BubbleNet sprl (Belgium)
- Code & Syntax (Spain) - <http://www.codesyntax.com/>
- Digital Creations (USA) - <http://www.digicool.com/>

Code & Syntax - zOpen Directory

zOpen Directory - euskaraz [hemen](#)

zOpen Directory lets you integrate the whole content of the Open Directory Project ([ODP](#)) into your Zope website. It's a remote parser. So no database has to be downloaded. Each click or query is sent to Dmoz.org, and results are parsed and recreated for Zope.

zOpen Directory needs two additional Zope Products to work: the [PathHandler](#) and Localizer, downloadable from <http://sourceforge.net/projects/lleu> . zOpen Directory works fine with Zope 2.3.3.

See the [Demo](#) and the [Product Homepage](#)

Check the current distribution's demo. This distribution brings these language versions: English, Basque, Spanish, French, Dutch, Catalan, German and Italian.

DISCLAIMER: If you have a look at the Python code there, you may cry horrified at what you see... Sure: it's the most awful piece of written code you ever saw. Well, it's all Luistxo's fault (Luistxo@eibar.org). I'm no programmer at all. I am a journalist with no technical background, and I began programming for the first time in my life in february 2001, at the advanced age of 34, and finished that Python parser two months later... Even after that, things like modules, functions, imports and classes sound like greek to me. However, this little monster that I created somehow manages to work. I suppose any Python programmer could do the same in just 30 minutes with %10 of lines...

WHAT

27-29 June 2005, Göteborg, Sweden

Europython is an annual conference for the Python and Zope communities. It circulates between different sites in Europe. Having started in Charleroi, Belgium, it is now in Göteborg, Sweden and will move to CERN in Switzerland next year. Europython is a community conference run by volunteers.

WHO

Europython brings together developers, designers and business people in the Python and Zope communities. You will meet people who have just begun their journey into this world as well as the people who started it all. This year we have a special focus on people who have no Python experience at all. If you are interested in why Python would be good for you, come to the Neophyte tutorials.

WHY

Europython provides inspirational talks and a friendly atmosphere, designed to help people build contacts and learn from each others experiences. You will meet interesting people, have a pleasant time and get to see Göteborg in its best season.

Localizer erabilpen kasua

Zope and Zope related

Localizer 1.1, and Case Studies

Juan David Ibáñez Palomar, Mikel Larreategi 30 minutes

Localizer is a mature Zope solution to build multilingual web applications. This talk will start with an overview of Localizer, then the new features introduced with the 1.1 release will be presented and the future of Localizer will be explored.

Two practical Case Studies will be exposed too.

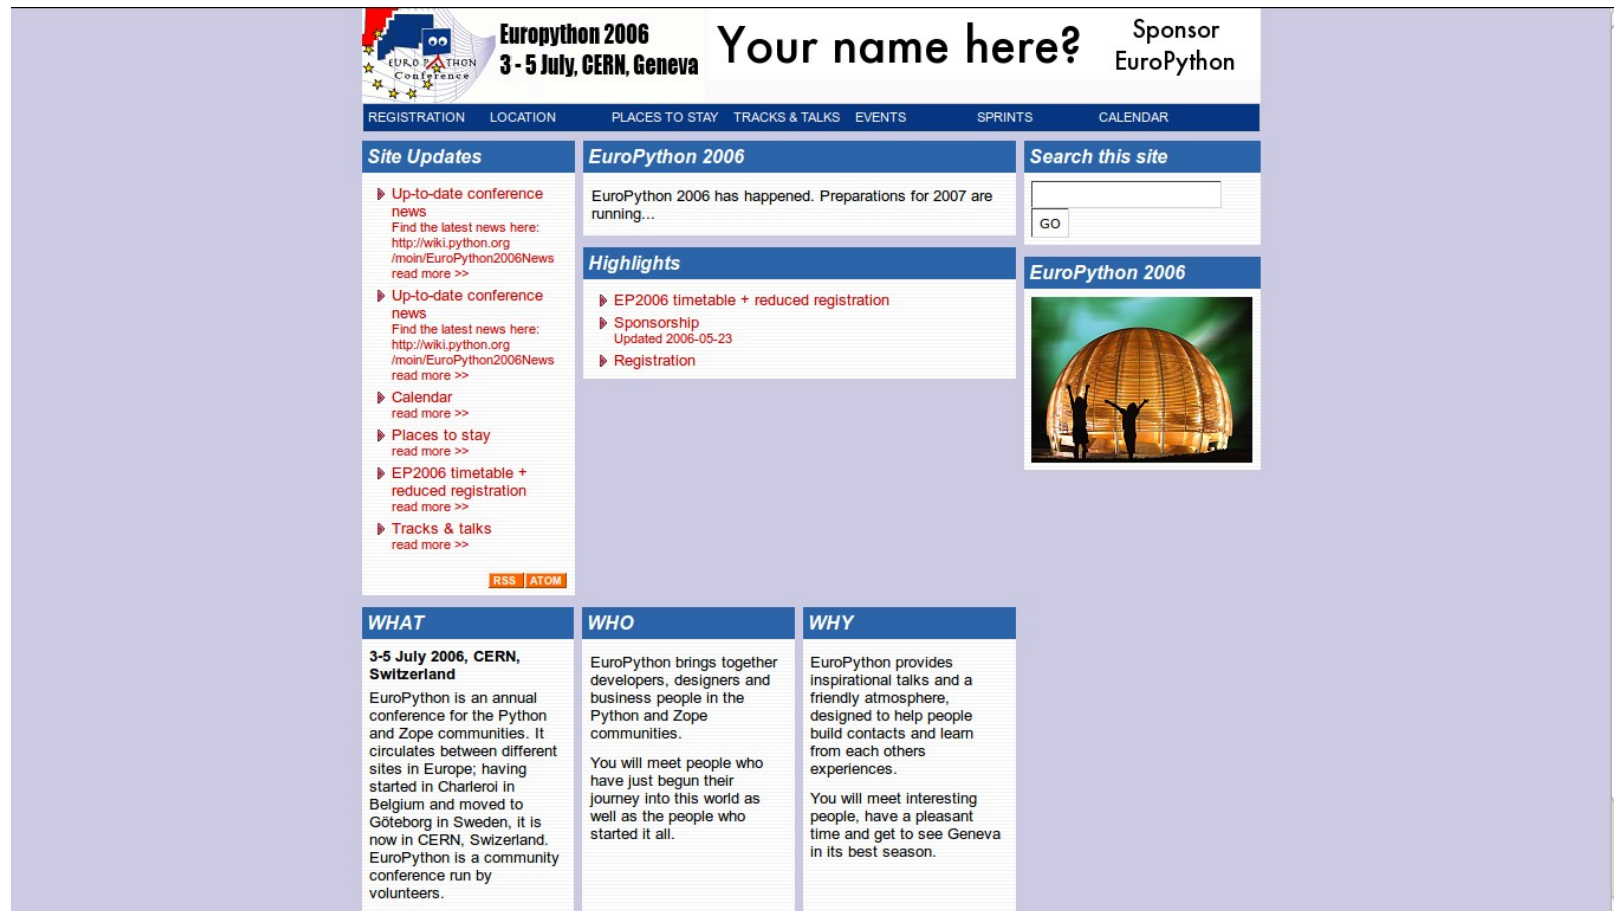

Sasha Vincic from the European Environment Agency will explain how to localize a large website with many languages.

Larreategui from CodeSyntax will explain the usage of Localizer in a bilingual website with a critical mission: the quite debated regional election in Spain, in which this website outstanced among those of the election rivals.

Tagzania

The screenshot displays the Tagzania website interface. On the left, a map of Berlin is shown with various districts labeled, including Spandau, Charlottenburg, Kreuzberg, and Prenzlauer Berg. A red tag is placed over the city of Berlin. Below the map, a caption reads: "This is the map with tag **berlin** created by user **wherelsikea**".

On the right side of the interface, the Tagzania logo is displayed with the tagline "CREATE AND SHARE YOUR MAPS". Navigation links for "Sign up" and "Login" are visible. A "Start your map" button is present. Below this is a search bar with the placeholder text "Search for a place" and a "SEARCH" button. A list of suggested places includes "Paris, Las Vegas, Istanbul, Venezia... and more.". A giraffe illustration is shown with a speech bubble that says "Twiga says: Now you can add Youtube videos".

At the bottom of the page, there is a red footer bar. On the left, it says "A PROJECT BY TAGZANIA SERVICES". In the center, there are links for "About Tagzania", "Blog", and "Twitter". On the right, there is a "Select your language" dropdown menu currently set to "English" and a "GO" button. The background of the footer features a silhouette of a savanna landscape with giraffes.

feedback

A tribe of **30,000** tagzanians are tagging the world.

Niagarank

The screenshot displays the Niagarank website with a dark header containing the logo and navigation links. The main content is organized into several columns:

- Left Column:** Features the logo of the 'ASOCIACION DE LA PRENSA MADRID' and an announcement for the 'Informe Anual de la Profesión Periodística 2014'. It also includes a logo for 'El Correo Ingresos' and a tweet from Gerardo Tecé (@gerardotc) with 25 relevant tweets.
- Middle Column:** Announces an event on '21 des. BARCELONA' featuring 'PABLO IGLESIAS' and 'GEMMA UBASART' at 12h at the 'Centre Esportiu Municipal Olímpics Vall Hebron'. Below this is a logo for '2015 COMENÇA EL CANVI' and a tweet from Pablo Iglesias (@Pablo_Iglesias_) with 62 relevant tweets.
- Right Column (Dark Panel):** Promotes 'Actualidad en tiempo real' in 42 thematic channels, followed by social media links and a 'BOLETÍN DIARIO' subscription form. It also mentions 'GOOGLE CURRENTS' and 'COMPARTIR NIAGARANK'.
- Bottom Left:** A section titled 'TELEVISIÓN' with the headline 'Los salarios aceleran su caída pese al inicio de la recuperación económica' and a link to 'economia.elpais.com'.
- Bottom Middle:** A section titled 'MEDIOS DE COMUNICACIÓN' with the headline 'Escucha el audio de Sergio'.
- Bottom Right:** A section titled 'POLÍTICA' with the headline 'Garzón defiende a Tania Sánchez de la dirección de IU Madrid: "Es probable que hayan perdido el rumbo"' and a link to 'ecodiario.eleconomista.es'.

What's DjangoCon?

DjangoCon Europe 2013, the best Django community event ever is on again! This time we've decided to put some more magic and came up with this crazy idea of throwing a fun Django conference in a real CIRCUS. Wonderful speakers, lovely city of Warsaw and amazing Django community. Ladies and Gentlemen, Children of all Ages, Welcome to the Greatest Show on Earth! See our [blog for more news](#).

WTF!

pyss 14 - Donostia

The image shows a screenshot of a Twitter post from the PySS Society (@acpys). The tweet text reads: "@erralin from @codesyntax giving his talk at #pyss14". Below the text is a photograph of a speaker at a podium in a lecture hall. The speaker is standing in front of a large screen displaying a slide titled "CodeSyntax" with the subtitle "What we do?". The slide lists several bullet points: "Collaborative news websites", "Community sites", "Corporate portals and intranets", "Multilingual sites / Localization", and "R&D". The speaker is wearing a red shirt. The audience is visible in the foreground, seated in rows of chairs. The tweet interface shows 3 retweets and 1 favorite. The timestamp is "09:42 - 2014 Ira. 27". The Twitter navigation bar at the top includes "Hasiara", "Jakinarazpenak", "Mezuak", a search bar with "Bilatu Twitterren", and a "Txokatu" button.
